

SPYROS GAVRIIL

(+357) 99756967 | spyrosgavriil01@gmail.com | github.com/sgavriil01 | linkedin.com/in/spyros-gavriil

EDUCATION

University of Cyprus

Expected Graduation: Jun. 2027

Bachelor of Computer Science | GPA: 8.18/10

Nicosia, Cyprus

- Relevant coursework: Operating Systems, Data Structures, Algorithms, Databases, and core Mathematics.

EXPERIENCE

pozare

Sep. 2026 – Present

Founding Engineer

Nicosia, Cyprus

- Building a mobile-first event photo-sharing platform using **Go** and **React/TypeScript**, with QR-based guest uploads and organiser workflows.
- Launched the public **marketing website** and waitlist while developing the core product.

Intergo Telecom

Jun. 2026 – Present

Software Engineering Intern

Remote

- Owning backend development for **SIP trunk provisioning and lifecycle management** in a multi-tenant CPaaS platform using **Java** and **Quarkus**, shipping features through to production.
- Developing REST APIs with tenant-scoped authorization, validation, and transactional safeguards that prevent invalid state transitions and cross-tenant access.

CYENS Centre of Excellence

Jun. 2025 – Sep. 2025

Software Engineering Intern

Nicosia, Cyprus

- Developed an AI storytelling platform using LangChain and custom LLM pipelines for multilingual branching narratives.
- Rebuilt TTS and image-generation pipelines, reaching **100% reliability** and resolving **10+ critical defects** before deployment.

OPEN-SOURCE CONTRIBUTIONS

Meta – Facebook/Pyrefly

Jan. 2026 – Mar. 2026

Open-Source Contributor

Remote

- Improved constructor-signature display and union-attribute suggestions in Meta's Python type checker and language server through **PR #2143** and **PR #2149**, both merged.

PROJECTS

ForgeQueue | Source Code

Go, PostgreSQL, Docker

- Independently designed and built a durable PostgreSQL-backed job queue in **Go** with concurrent workers, retries, dead-letter jobs, lease-based recovery, and HTTP job submission.
- Coordinated workers safely with **FOR UPDATE SKIP LOCKED**, heartbeat-based lease renewal, and expired-job reclamation to recover work after worker failure.
- Added Prometheus/Grafana observability and k6 load tests; processed a **10,000-job backlog** at over **35 jobs/sec** while validating retry and recovery behavior.

One-Stop Ride-Hail (OSRH) | Source Code

T-SQL, SQL Server, Python

- In a three-person team, reduced query latency to **sub-second levels** on **10k+ rows** by designing indexed T-SQL stored procedures and optimizing transactional workloads.
- Hardened application security with HMAC-SHA256 password hashing and server-side authorization to prevent privilege escalation.

Polyglot Meeting Assistant | Source Code | Live Demo

FastAPI, FAISS, Whisper, Python

- Built a FastAPI/React application for content ingestion, summaries, action items, session management, and semantic search over FAISS-indexed results.

TECHNICAL SKILLS

Languages: Java, Go, Python, SQL, C

Backend & Frameworks: Quarkus, Spring Boot, FastAPI, RESTful API Design, LangChain

Databases & Messaging: PostgreSQL, SQL Server, MySQL, Redis, Kafka

Testing & Tooling: JUnit, k6, Git, Docker, Maven, Postman, Linux

DevOps & Observability: CI/CD pipelines, Prometheus, Grafana, Vercel
